

**NEW ERA OF CLOUD
COMPUTING**

pactera **EDGE**

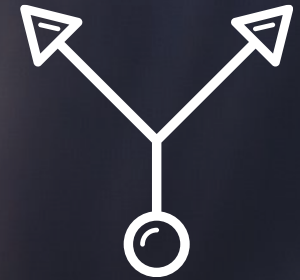

Every year, more and more businesses are adopting cloud. While traditionally thought of as an IT decision, cloud is increasingly being considered a business decision to enable company functions. Look at **five reasons** why more businesses are adding the cloud to their technology arsenals.

CLOUD OFFERINGS

Hosting Solution

- Setup and configure Cloud IaaS and PaaS Environment
- Compute, Container and Serverless computing Environment
- Storage solution
- Network Solution
- Security & Identity Solution
- High Availability and Scalability
- Hybrid Cloud solution

Migration Solution

- On-Premise to Cloud
- Cloud to Cloud
- DB Migration
- Application Migration

Backup and DR Solution

- Cloud Backup and Archive Solution
- Cross location Disaster Recovery Solution
- Log Analytics

Automation

- Process Automation
- Terraform, PowerShell, Python and Runbooks Execution
- Configuration Management
- Update Management
- Shared Capabilities IAM, Tag, Auditing

CLOUD AS AN INNOVATION PLATFORM

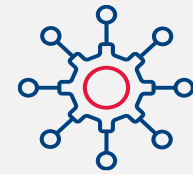

PLATFORM

AI/ML

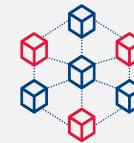

Big data

IoT

RPA

Block chain

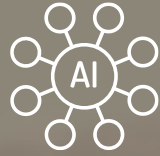

docker

Containers

DevOps

CLOUD AS AN INNOVATION PLATFORM

AI/ML

- AI:**
- Connections to all consumer interactive channels like WeChat, Skype, FB Messenger & Corporate Chatbots
- ML:**
- Handle multi-dimensional data
 - Solve classification and regression problems

DL: Best results with unstructured data

RPA

- RPA for automation of low intervention tasks

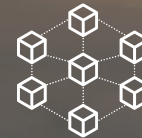

IoT

- Industrial IoT solutions for Predictive Maintenance & Smart Manufacturing
- Integration with popular cloud platforms – Azure, Alibaba cloud & Others

Analytics & BIG Data

- Dive into analytics with data warehousing
- Batch processing
- Stream processing
- Analytical data store

Blockchain

- uses protected cryptography to secure the data ledgers
- The transactions are recorded in chronological order
- The blockchain technology allows for verification without having to be dependent on third-parties.

DevOps and Containers

- CI/CD deployment
- Enable faster release & Deployment Cycles
- Achieve Maximum Efficiency
- Simplify the deployment

CLOUD SOLUTIONS

Media
Solutions

CLOUD SOLUTIONS

Smart Retail

- Online and Offline Integration
- Enable customers to receive personalized services
- Inventory management and marketing

Industry 4.0

- Edge based solutions
- Any device any Protocol
- BYO Encryption
- Fastest Data Monetisation

E-commerce Solution

- Transact more sales, more often, more securely
- Auto-scaling allows businesses to synchronize resources with actual demand

Financial Services

- Risk Management: Anti-fraud, anti-money laundering
- Credit risk evaluation and regulatory risk management

Media Solutions

- Video on demand
- Live video broadcast
- Video Surveillance

Smart Logistics

- Transport management solution
- Warehouse management solution
